Applicant Organization	#	Project Name	Project Purpose	Status	Date Approved	Approved Funding
Dzawada'enuxw First Nation	0646	Padakus Creek 350kW Hydropower Facility Development	To replace the existing fossil fuel-dependent electrification facility serving the 95 residents of the village of U'kwanalís with a new 350kW hydroelectric project on Padakus Creek, a tributary to Gwa'yi (Kingcome River); this will supply 97% of the community's electricity needs and is expected to displace over 265,000 liters of imported diesel fuel annually, reducing the cumulative greenhouse gases by approximately 30,000 tonnes of carbon dioxide equivalent emissions over the project life, while also providing employment and training opportunities for community members during the construction and operation of the new facility.	Active	10-Mar-2020	\$ 3,300,000
Kitasoo Band Council	0648	Klemtu Hydropower Facility - 1.7MW Modernization and Expansion	To upgrade and modernize the existing Baron Lake hydroelectric power facility serving the 300 residents of the community of Klemtu; this will supply 100% of the communities electricity needs and is expected to displace over 1,300,000 liters of imported diesel fuel annually, reducing the cumulative greenhouse gases by approximately 145,966 tonnes of carbon dioxide equivalent over the project life, while also providing employment and training opportunities for community members during the construction and operation of the expanded facility.	Active	10-Mar-2020	\$ 4,600,000
					TOTAL:	\$7,900,000
